

CONCRETE PARTNERS

PARTNERING BUILDERS & DEVELOPERS

CAPABILITY STATEMENT

0413 234 803 | CONCRETEPARTNERS.COM.AU

Concrete Partners is a leading concrete construction company operating all over Queensland & Northern NSW, specialising in industrial, commercial and civil concreting.

Concrete Partners continually seek and implement new technologies to be at the forefront of the concreting industry.

Concrete Partners utilises their own laser screed in combination with total station and ride-on trowelling machines to produce high quality and accurate finishes. We also utilise our own laser-guided grader attachment on our posi-track to provide an accurate sub-grade level. This ensures minimal concrete wastage.

In combination with the Total station we can provide a superior level of accuracy when setting out projects. The Laser Screed is the ideal machine to work in conjunction with the Helix product to produce highly accurate floor levels. High quality flat-floor finishes are achieved with a combination of the newest technology and highly experienced finishers.

CONCRETE
PARTNERS

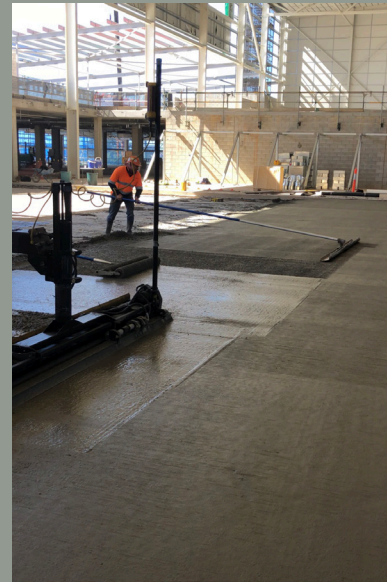

David Jones

With more than 30 years in the concrete industry, David has a vast array of experience in all facets of concreting. His hands-on management approach leads from the front, demonstrating the direction required to complete projects on time, with quality and accuracy. David currently sits on the board of directors for the Master Concreters Association.

Tim Kruger

Tim has more than 20 years in the concrete industry with strong project management skills and the ability to organise and motivate workers. Combining this with coordination of suppliers and subcontractors, Tim brings a wealth of knowledge and skill to Concrete Partners.

With over 50 years of combined experience in the industry, David Jones and Tim Kruger are backed up by quality processes including pre-pour and post-pour inspections to ensure the most stringent specifications are adhered to. The combination of David and Tim gives Concrete Partners vastly more experience and committed management skills, with an invested focus.
